

Scratch-n-Sniff

**We make fats, oils and grease
smell like nothing at all.**

Fences make good neighbors. Ecosorb® makes happy neighbors.

There's nothing pleasing about fats, oils and grease processing odors. But you already know that. You're the one that has to deal with complaints from local businesses and residents.

But what if those odors were to vanish? They can with Ecosorb 505G.

Ecosorb 505G, available in unscented or orange scent formulations, is a non-toxic odor neutralizer. It uses the power of science to effectively bond with and eliminate the odor-causing molecules contained within fats, oils and greases.

Ecosorb 505G.

Make grease odor – and neighbor complaints – go away!

There are plenty of reasons why Ecosorb makes sense for grease odors.

✓ EFFECTIVE

Ecosorb 505G is not a masking agent. It completely removes both organic and inorganic odors, including those malodors caused by long chain fatty acids such as grease and oil.

✓ SAFE

The Ecosorb 505G formulation is 100% non-hazardous, non-toxic and is completely safe for operating personnel.

✓ VERSATILE

Ecosorb 505G can be applied using various delivery systems to accommodate for various factors including climate, location, architecture, odor concentration and airflow.

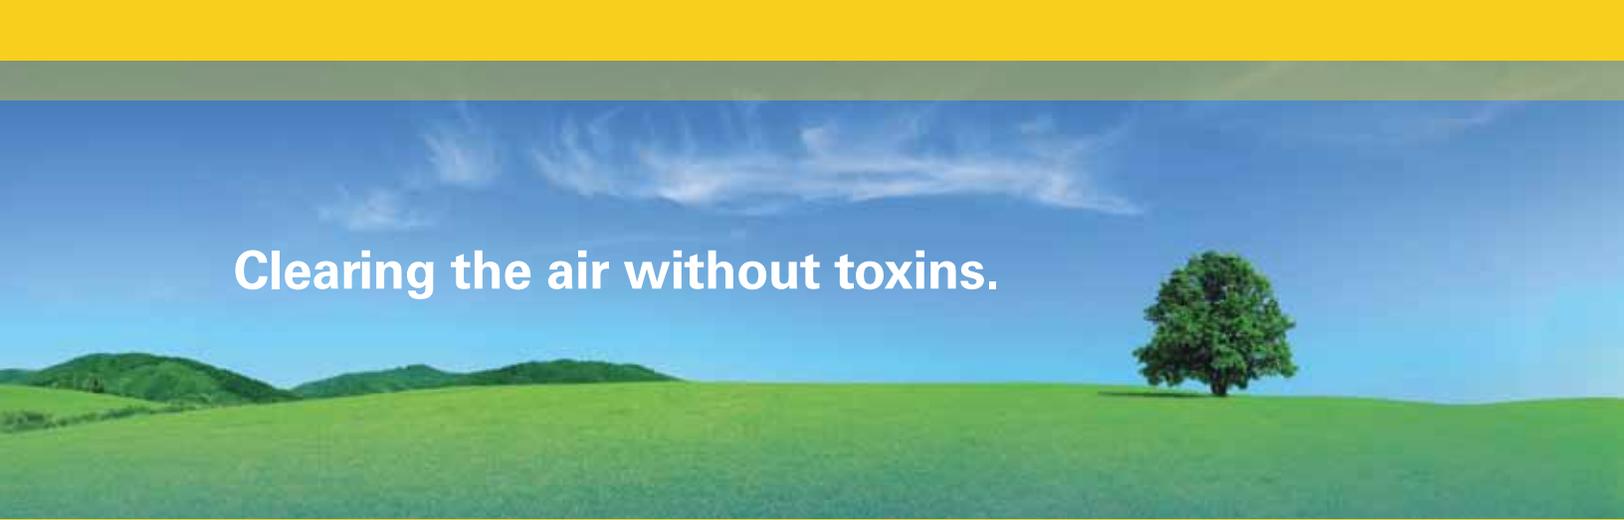

Applied via spray nozzles or fans, an Ecosorb 505G delivery system is easy and affordable to implement into any facility.

✓ PROVEN

Ecosorb has been successfully solving odor problems in the most challenging environments including wastewater plants, refineries, processing plants and solid waste facilities for more than 20 years.

Discovering *slick* ways to eliminate grease odors.

OMI
INDUSTRIES

Clearing the air without toxins.

OMI Industries specializes in non-toxic, safe-to-use and be-exposed-to odor control products using our highly effective Ecosorb® technology. We are able to engineer solutions that solve a variety of organic and inorganic odor control issues, from year-round odor problems due to a production process, seasonal odor problems due to temperature, occasional odor problems due to a particular project or any other unique odor challenges you face.

From landfills to grease processing facilities, oil refineries to municipal wastewater facilities, no odor neutralizer is more adaptable to specific situations or more effective at removing odors - safely and quickly - without the use of harsh and hazardous chemicals, expensive emission control systems or fragrant masking agents.
